

Kentucky.gov Gets a Face Lift

The Commonwealth of Kentucky web-site has a whole new look that will make it easier for visitors to find information and services online. The address is still the same, Kentucky.gov, but the design of the new site places more importance on helping visitors find what they need by topic rather than by state agency or department.

Kentucky.gov now offers several new features that simplify access to Kentucky's eGovernment services and provide a streamlined and consistent look & feel throughout the portal, including:

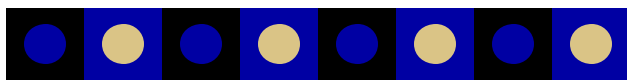

? Live Online Customer Service -

Dedicated online live support provides assistance in real-time, answers visitor questions, and enhances the support experience for users by offering immediate customer service.

? State Government News Room - Kentucky state agency news releases will be available in the News Room, and government entities may post press releases that can be automatically distributed to search engines, other government agency Websites, and e-mail lists.

? Google Search Technology - The Kentucky.gov site uses Google, the nation's leading search engine technology to search content and services on the site.

? Kentucky Calendar of Events - A statewide events calendar integrates the Governor's public schedule, state parks and tourism events with other government activities including public meetings, tax deadlines, game & fish seasons, and state holidays.

COMMONWEALTH COMMUNIQUE

The new edition of the Commonwealth Communique will be online September 30th at <http://communique.ky.gov/>.

AASHTO NEWS

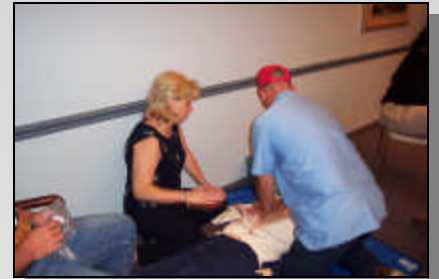

A special AASHTO newsletter will be posted to KYTC's homepage the second week of October.

**SAFETY
FIRST!**

District 7 personnel attended CPR and First Aid training at the District 7 Office in Lexington. The training was provided by the Division of Employee Safety and Health.

Nina Hill, with the Division of Employee Safety and Health Division, works with District 7 employees on CPR and First Aid Training.

The Division of Employee Safety and Health along with the local electric company help provide a High Voltage Training Session to District One personnel.

A field training day for pesticide applicators sponsored by the Roadside Environment Branch was held in August at the University of Kentucky Research Farm and Education Center in Princeton. Approximately 100 Special Crew and County Crew personnel from seven districts were in attendance. Weed control experts from U. K., Monsanto, and the Roadside Branch conducted the training.
